Diagram for Laying Track in Concrete

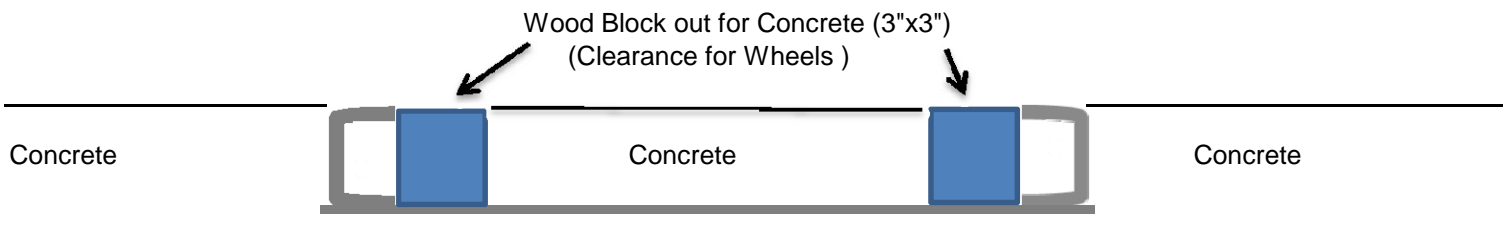

Top View

(of a track section with wood blocking on the inside of the track)

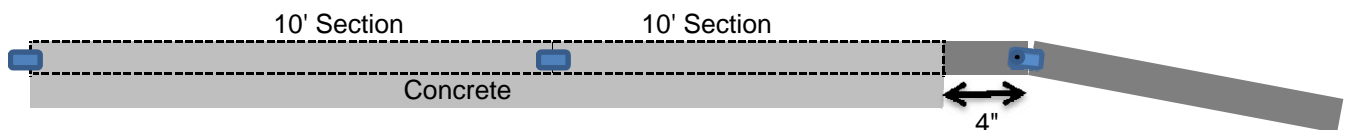

-  Track Section
-  2x4 Material for blocking out concrete

End View

Inside Side View

Track section should extend 4" beyond the concrete to allow for next section to connect.

Maximum drop of first section is 6" to prevent the carriage from scraping the concrete as it leaves the building.

Note: *Point "Connection Tabs" toward drive unit away from lake.*
